a) niskuk
b) amiskuk
c) namaywuk

Where is this hydro dam going to be?
a) Burntwood River
b) Lower Nelson River
c) Hayes River

What is this called?
a) spillway
b) dyke
c) powerhouse

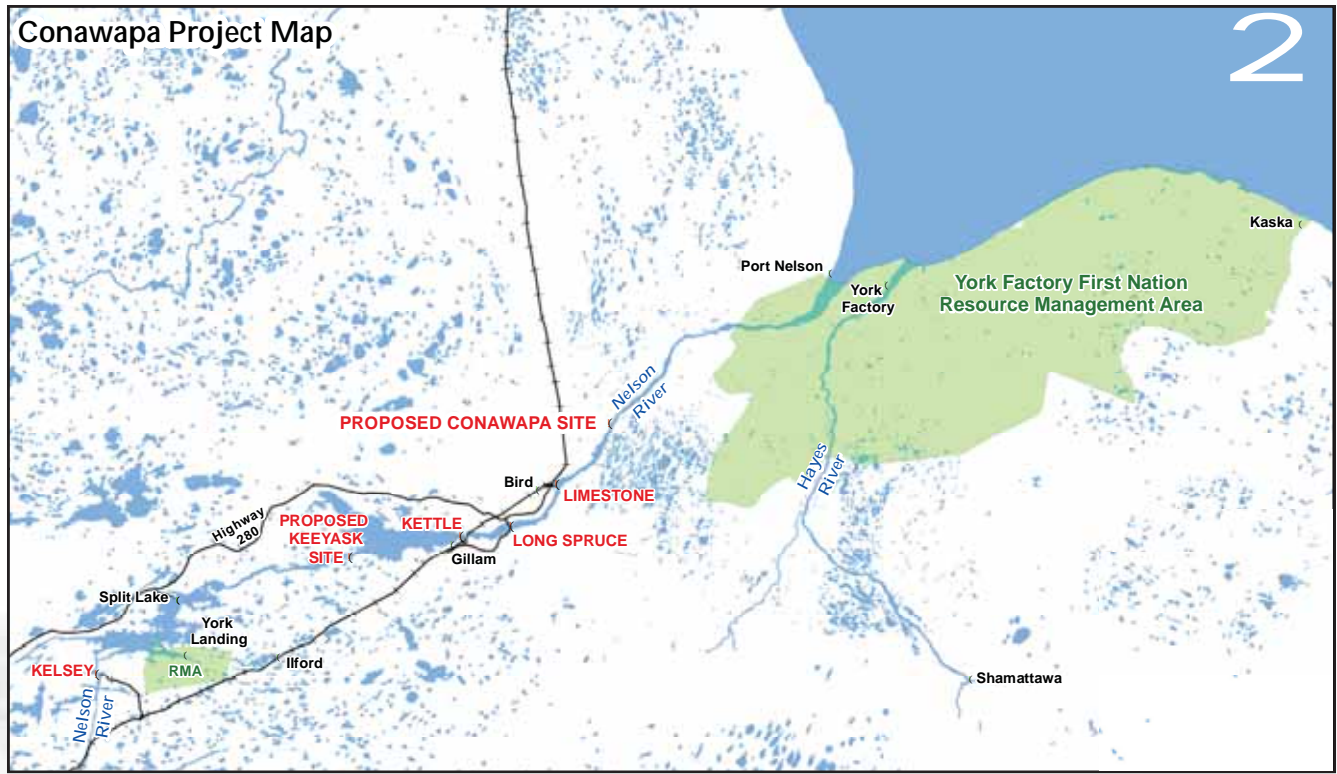

March 2013

MANITOBA HYDRO'S CONAWAPA PROJECT

Manitoba Hydro is currently planning the Conawapa Project. Hydro hopes to get licenses to start construction around 2016/2017. **Do you know what licenses Conawapa will require?** If built, Conawapa will be largest hydroelectric dam in Manitoba. It will also be the seventh dam built on the Nelson River. **The Conawapa project is located in an area traditionally used, occupied, and managed by YFFN.** A large amount of jobs will be created, the landscape will be changed, and it could affect York Factory. The Conawapa Dam will flood about five square kilometers of land.

How will this affect you, your family, and your community?

YFFN has been engaged in the planning process with Manitoba Hydro for some years now. Many community members feel that your input has been missing. **We would like to find out from you, the youth of York Factory, how we can include you in the planning process.**

How the Conawapa Project is Planned
